

THE COMPLETE START-TO-FINISH SOLUTION

START TO FINISH SOLUTIONS

FinFlow Batch Equipment, designed by industry leader PEM Inc., is innovative, quality finishing equipment for OEMs, job shops and fabricators to meet their needs for batch powder and liquid coating. FinFlow Batch Equipment can add capacity, allow you to bring finishing in-house or expand your service line with our pretreatment systems, wash bays, powder booths, liquid booths and ovens.

CLEAN

PRETREATMENT WASH BAY ENCLOSURES

The FinFlow Wash Bay enclosures and pretreatment systems are designed in a variety of openings and lengths with quality LED lighting and exhaust. The panels are powder coated and designed as single-entry or pass-through with open-faced or filtered door options.

The FinFlow Wash Bay is packaged with the industry-leading P-300 SprayWand Pretreatment System for high-quality cleaning and efficiency. The SprayWand system offers a variety of pretreatment processes to provide the best cleaning, adhesion and corrosion protection available in manual pretreatment.

BATCH EQUIPMENT

COAT

LIQUID AND POWDER COATING BOOTHS

The FinFlow Liquid and Powder Coating Booths offer the same flexible design for various product and throughput needs. The enclosures provide adequate airflow and quality filtration systems. They are designed as single-entry or pass-through booths with open-faced or filtered door options.

CURE

BATCH OVENS

The FinFlow Batch Ovens offer quality liquid and powder coating cure and dry off oven designs with a quick and efficient Roll Seal door design. The oven is built with six-inch insulated panels and quality burner components—to provide an efficient cure and dry off process. Ovens are designed as single-entry or pass-through in various opening sizes and length requirements.

FINFLOW BATCH EQUIPMENT

PRODUCT INFORMATION

FinFlow Batch Equipment offers various products for your complete process needs.

- Wash Bay Enclosures
- SprayWand Pretreatment Systems
- Powder and Liquid Coating Booths
- Powder Application Equipment
- Cure and Dry Off Batch Ovens

TURNKEY SOLUTIONS

Each FinFlow Batch System can be built to fit your process needs from pretreatment through cure. Ask about installation details and options from full turnkey install to supervisory installation labor.

OPTIONS & ACCESSORIES

RO WATER SYSTEMS

Efficiently produce high-quality reverse osmosis water to increase the quality of your pretreatment process.

HOSE REELS

The best way to control hose management. Neatly stores hoses out of the way and helps prolong the life of your pressure hoses.

GUN HOLDERS

Helps keep your guns and wands off the floor. Can be easily mounted to a wall and made of stainless steel to stand up to wash bay environments.

SPECIFICATIONS

WASH BAYS

Sizing	Various product opening heights and widths available in 2' increments and lengths in 2-6" increments
Enclosure Design	Powder coated white 18-gauge steel panels, bolt together design
Exhaust Fans	Tube axial fans of various CFM for quality airflow and moisture containment throughout the booth
Lighting	All LED lighting
Layout Options	Single-entry, pass-through, filtered doors available
Control Panel	ETL listed, various voltages available
Options	Hose Reels, Gun Saddles, Secondary Containment, Sump Pumps

PRETREATMENT SYSTEMS

SprayWand Manual Pretreatment Systems
High Pressure Downstream Injection Systems - alkaline, phosphate, zirconium, sealers
Heated and ambient applications
Two-stage efficient coils
ETL/CSA listed

POWDER BOOTHS

Sizing	Various product opening heights and widths available in 2' increments and lengths in 2-6" increments
Enclosure Design	Powder coated white 18-gauge steel panels, bolt together design
Filtration	Various CFM collectors through cartridge and final filters with automatic purge system
Lighting	All LED lighting
Control Panel	ETL listed, various voltages available

POWDER APPLICATIONS

Nordson Encore family of products
Wall mount, hopper and vibratory box feeder powder gun systems
nLighten LED gun mounted light

LIQUID BOOTHS

Sizing	Various product opening heights and widths available in 2' increments and lengths in 2-6" increments
Enclosure Design	Powder coated white 18-gauge steel panels, bolt together design
Filtered Exhaust	Various CFM exhaust fans through filter wall with 20" x 20" high-quality paint filters
Lighting	All LED lighting
Control Panel	ETL listed, various voltages available

BATCH OVENS

Application	Powder and liquid coating cure processes and dry off applications
Sizing	Various product opening heights and widths available in 2' increments and lengths in 2-6" increments
Panels	6" insulated oven panels
Heat Distribution	Sidewall heat ducting with adjustable louvers to add airflow control
Doors	Roll Seal high temp automatic roll up door as well as manual swing door options
Burners	End mount, side mount or top mount designs available
Control Panel	ETL listed, various voltages available
